

District Action Steps to Secure iPad

- ✓ All iPads were asset tagged by Apple
- ✓ All iPads were registered and inventoried using the district's Jamf Software
- ✓ Server: This provides reporting capabilities (electronic trail) when the devices are within the school district.
- ✓ Each iPad was registered to a Monroe Township High School student.
- ✓ All iPads were configured with MobileMe accounts. This provides us the ability to locate the devices anywhere in the world, as long as the device is connected to the Internet at any time via WiFi or individual networks.
- ✓ Installation of apps was disabled on all student devices.
- ✓ Deletion of apps was disabled on all student devices.
- ✓ Creation of new accounts was disabled on all of the student devices.
- ✓ Deletion of existing accounts was disabled on all of the student devices.
- ✓ Location service was enabled and locked on the iPad.
- ✓ Restrictions were enabled on each iPad.
- ✓ District Acceptable Usage Policy revised and disciplinary actions in place for student violations.
- ✓ Met with local Police Department to raise their awareness and to partner with regarding vandalism, theft, or loss of iPads.
- ✓ Please visit our iWeb site on this learning initiative at:
